Fairfax Imaging Adds MavBridge™ to the Quick Modules Suite

Fairfax Imaging announced a reseller agreement with Mavro Imaging in August of this year that enables us to integrate the MavBridge™ product suite into our Quick Modules software suite for both government and commercial customers.

MavBridge™ brings the components necessary to provide our customers a new and greater level of visibility into the real-time performance of our solutions, making Fairfax Imaging an even more competitive integrator in the data capture and remittance processing industry.

The MavBridge dashboard component contains a unified display (both current and historical) of workflow that can be filtered to focus on specific operators, devices, or tasks. The features will enable Fairfax Imaging's customers to:

- Track scanner, extractors and other mechanical productivity by active run time and total wall clock time.

- Compare machine throughput by shift, operator or job.
- Discover potential issues early to optimize production and minimize downtime.
- Measure operator productivity continuously. View volume, throughput, idle, and productive time as well as a variety of detailed information. Evaluate operator performance objectively against other operators, target thresholds or site averages.
- Monitor various system benchmarks such as volume by category, transaction, page, and page type. Obtain information such as complete work inventory and jobs processed.
- Produce comprehensive reports that facilitate accurate internal planning and forecasting.

Fairfax Imaging one of the World's Largest Software Companies

In September of this year, Fairfax Imaging was named to Software Magazine's 27th Annual Software 500 list of the largest software companies.

Fairfax Imaging today announced its inclusion in Software Magazine's Software 500 ranking of the world's largest software and service providers, now in its 27th year.

"It is a testament to the entire team at Fairfax Imaging Inc. that we have been included in this list," said Michael D. Minter, VP of Sales and Marketing. "We have shown steady growth since 1994 and are excited that our expansion allows us to be included on this prestigious list of companies."

"The 2009 Software 500 results show that revenue growth in the software and services industry was healthy, with total Software 500 revenue of

\$491.3 billion worldwide for 2008 representing 8.8% growth from the previous year," says John P. Desmond, editor of Software Magazine and Softwaremag.com.

The Software 500 is a revenue-based ranking of the world's largest software and services suppliers, targeting medium to large enterprises, their IT professionals, software developers and business managers involved in software and services purchasing.

The ranking is based on total worldwide software and services revenue for 2008. This includes revenues from software licenses, maintenance and support, training and software-related services and consulting. Suppliers are not ranked on their total corporate revenue, since many have other lines of business, such as hardware.

Products

Quick Modules is a modular software suite which can be tailored to meet your requirements with the following components:

- Intelligent Data Capture
- Remote Data Capture
- Intelligent Character Recognition
- Image Enhancement
- Data Perfection
- Business Rule Support
- Complex Field Validation
- Payment Processing
- Electronic Check Presentment
 - ARC/ACH
 - Check 21
 - Encoding/ Endorsing
- Transaction Balancing
- Export to Legacy Systems
- Data and Image Archival
- System Recovery

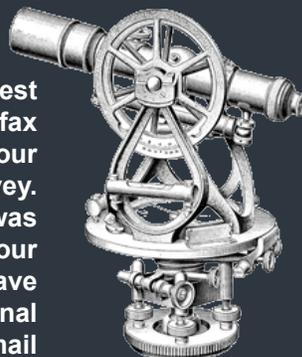

Services

Fairfax Imaging is a full-service, solution integrator providing:

- Business Process Re-engineering
- Project Management
- Quality Assurance Planning
- Disaster Recovery Planning
- Form Design
- Hardware Installation
- Software Installation
- Comprehensive Testing
- Training at all levels
- Maintenance & Support

Annual Customer Survey

In our continued effort to provide the best products and support in the industry, Fairfax Imaging is requesting feedback from our customers via our annual customer survey. The input from the first survey last year was very informative, and we look forward to your comments regarding improvements you have seen as well as identifying areas for additional focus. The survey will be sent to you via email

and will only require 10 minutes to complete. All of the answers will remain confidential. It is our hope that these surveys will continue to give us constructive information about our current products and services and offer insight on how we can improve. We deeply appreciate the time and effort of each participant
